UNIVERSITI MALAYSIA SARAWAK
Faculty of Computer Science and Information Technology
TMA3084 Software Engineering Laboratory | Semester 1, 2026/2027

TSPi STUDENT INFORMATION SHEET (Form INFO)

Submit via eLeap (Week 3, Wed 7 Oct 2026). Used for team formation (4–5 members) and TSPi role assignment. Keep a copy in your own partition of the Project File.

A. Student Details

Full name	Yolanda Erica Laie Anak Collin Amban		
Matric no.	103029	**Date**	6 Oct 2026
Programme / Major	Software Engineering	**Year of study**	3
Credits registered this semester	18	**Expected graduation**	Semester 2 / Year 4
UNIMAS email	103029@siswa.unimas.my	**Phone / WhatsApp**	013-4490488
GitHub username	yxlnda	**Lecturer**	Ts. Nurfauza Jali
Lab group (Wed 4–6 pm)	☐ Group 1 – Mr. MD. Aminul Islam Rakib ✓ Group 2 – Mr. Raynold anak Kabai		

B. Technical Self-Assessment

Rate honestly: 1 = never used, 3 = used in a course assignment, 5 = built a working product with it. Tick one box per row.

Skill area (course requirement)	1	2	3	4	5	Evidence (course, project, link)
Dart and Flutter mobile development	✓	☐	☐	☐	☐	
Object-oriented programming (any language)	☐	☐	☐	✓	☐	Past assignments
Git and GitHub (branches, pull requests, code review)	☐	☐	✓	☐	☐	StudentBuddy AI chatbot (hackathon)
UI/UX design (Material 3, Figma, wireframes)	☐	☐	✓	☐	☐	
Backend / database (Firebase, Supabase, REST, SQL)	☐	☐	✓	☐	☐	StudentBuddy AI chatbot (hackathon)
Software testing (unit, widget, integration tests)	✓	☐	☐	☐	☐	
CI/CD (GitHub Actions) and build/release	☐	✓	☐	☐	☐	
AI API integration or prompting (Gemini, Claude, OpenAI, ML Kit)	☐	☐	✓	☐	☐	StudentBuddy AI chatbot (hackathon)
Requirements and design documentation (SRS, SDS, UML/ERD)	☐	☐	✓	☐	☐	Past assignments
Planning and time tracking (PSP/TSPi, Agile/Scrum)	✓	☐	☐	☐	☐	

C. Development Resources and AI Tool Access

A paid AI plan is not required for any assessed task. Never share accounts, and never paste client data or API keys into AI tools.

Laptop able to run Android Studio + emulator (≥ 8 GB RAM recommended)	✓ Yes ☐ No OS: ✓ Windows ☐ macOS ☐ Linux RAM: 8 GB
Physical test device(s)	✓ Android (version Windows 11) ☐ iPhone (iOS _____) ☐ None
AI coding tools you can access (own account only)	✓ ChatGPT/Codex – Free / Plus ☐ Claude – Free / Pro ✓ Other: Microsoft Copilot Free

D. Relevant Experience and Interests

E.g. apps or systems you have built, languages and frameworks, design or testing work, internships, interest areas (mobile, AI, UI/UX, data).

- Developed a StudentBuddy AI chatbot using Python, Flask, OpenAI API, and Supabase, with features such as contextual responses, reminders, and student support services.
- Implemented object-oriented programming concepts in Java projects, including inheritance, polymorphism, encapsulation, aggregation, and exception handling.
- Designed and implemented a FitLife Wellness Centre database application, including ERD design, normalization, MySQL database development, and PHP-based CRUD operations.
- Familiar with Python, Java, C++, SQL, Flask, MySQL, Git/GitHub, Unity, and basic web application developments.
- Interested in Software Development, Artificial Intelligence, Database Systems, UI/UX Design, and Backend Development.

E. Previous Team Projects

For each project: title, team size, your role, what you personally delivered, tools used (e.g. GitHub, Trello).

- StudentBuddy AI Chatbot
  - Team Size: 3 members
  - Role: Backend Developer
  - Delivered: Flask API, AI integration, reminder functionality, database connectivity, chatbot logic
  - Tools Used: Python, Flask, OpenAI API, Supabase, GitHub
- FitLife Wellness Centre Database System
  - Team Size: 4 members
  - Role: Database Designer
  - Delivered: ERD, normalization, Crow's Foot diagram, database schema, reports implementation
- KITH Unity Application (Incomplete)
  - Team Size: 4 members
  - Role: App Developer
  - Delivered: Scene creation, navigation structure, UI implementation
  - Tools Used: Unity, GitHub

F. Leadership or Management Positions

At work, in clubs, societies, residential colleges or events, e.g. committee head, treasurer, teaching assistant, event coordinator.

None

G. Project and Client Ideas (optional)

A real client with genuine intent to use the app for at least 3 years: UNIMAS department, local business, agency, faculty staff, student club or student entrepreneur. Include one AI-driven feature idea.

Possible client and contact	
Mobile app idea	
AI feature idea	

H. Team Preferences and Meeting Logistics

Classmates you would like to work with (optional)	-
Where you stay during the semester	☐ UNIMAS college ✓ Kota Samarahan ☐ Kuching ☐ Other: _____
Own transport for client site visits	✓ Yes ☐ No
Available for client meetings	☐ Weekday evenings ☐ Saturdays ✓ Online only

I. Weekly Commitments

Mark each slot: C = class, W = part-time work, A = club / sport / other activity. Leave free slots blank. The Wednesday 4–6 pm lab is fixed. Add exact times in the notes row if they do not match the slots.

Time	Mon	Tue	Wed	Thu	Fri	Sat	Sun
8:00 – 10:00				**LECTURE TMF3113**			
10:00 – 12:00			**LECTURE TMA3804**				
12:00 – 14:00			**LECTURE TMF3963**	**LECTURE TMF3973**			
14:00 – 16:00		**LECTURE TMF3113**		**LECTURE TMF3973**	**LECTURE PBM2072**		
16:00 – 18:00			**LAB TMA3804**	**LECTURE TMF3093**			
18:00 – 20:00				**LECTURE TMF3093**			
20:00 – 22:00							
Notes	Monday: - Tuesday: TMF3113 (2-4) Wednesday: TMA3084 (9-11) TMF3963 (11-1) TMA3084 (4-6) Thursday: TMF3113 (9-10) TMF3973 (1-4) TMA3093 (4-7) Friday: PBM2072 (2-4)						

Preferred slot for the weekly team meeting: Monday (at any time) or Friday 12-2 (weekly meetings feed the WEEK report and meeting minutes)

J. TSPi Role Preferences

Rank each role from 1 (least preferred) to 5 (most preferred); several roles may share a rank. Every member also develops and owns at least one feature (FR-IDs) through issue → branch → PR → CI. Roles are assessed under 'Role assignment' (Peer/Individual Evaluation) and 'Team work' (Project Evaluation). In a 6-member team, one role is shared by two members.

TSPi role (project role)	Main responsibilities and evidence produced	1	2	3	4	5
Team Leader *(Scrum Master & Client Contact)*	Runs sprint and weekly meetings; WEEK reports and meeting minutes; main contact for client meetings; leads Team Evaluation; owns client acknowledgement form and final submission package	☐	☐	✓	☐	☐
Development Manager *(Tech Lead & AI Integration)*	Flutter architecture and state management; SDS (UML, ERD, component and interface design); AI API integration and fallback; coding style; reviews and merges PRs to main	☐	☐	☐	✓	☐
Planning Manager *(Product Owner & Schedule Lead)*	Requirement elicitation and SRS (FR-IDs); product backlog and requirement changes; TASK, SCHEDULE, SUMTASK and earned value; GitHub Projects board and milestones M1–M4	☐	☐	☐	✓	☐
Quality/Process Manager *(QA & Test Lead)*	Test plan; LOGTEST, LOGD, SUMQ, SUMP; unit, widget and integration tests (≥50 cases); CI gate and ≥60% coverage; UAT with the client	☐	✓	☐	☐	☐
Support Manager *(DevOps & Documentation Lead)*	Repository, branch protection and GitHub Actions; secrets and API key protection; LOGAI and CCR; release APK v1.0.0; README and user manual	☐	☐	✓	☐	☐

K. Declaration

I confirm that the information above is accurate. I understand that it will be used for team formation and role assignment, that I must follow the TMA3084 AI usage rules (spec first, PR review, LOGAI records), and that I remain responsible for all work I submit under the UNIMAS academic integrity policy.

Signature		**Date**	6 Oct 2026

TSPi Student Information Sheet – Instructions

Purpose	• Describe your background, skills, availability and role preferences so the teaching team can form balanced teams of 5–6 members and assign TSPi roles.
General	• Complete the form and hand it to your lab demonstrator during Lab 01 (Week 3). • Each member keeps a copy in their own partition of the Project File (checklist item: Student Information Sheet). • Use additional pages if necessary.
A. Student Details	• Enter your name, matric number, programme, year, credits registered this semester and expected graduation. • Give your GitHub username; it is needed to add you to the course GitHub organisation and your team repository. • Tick your lab group.
B. Self-Assessment	• Rate each skill area from 1 to 5 and give brief evidence (course code, project name or repository link). • Honest ratings help spread Flutter, testing, design and documentation skills across teams.
C. Resources	• State whether your laptop can run Android Studio and the emulator, and which test devices you own. • List the AI coding tools you can use with your own account. AI use is logged in LOGAI from Lab 04 onwards.
D–F. Experience	• List experience, team projects and leadership positions that would help the instructor make team and role assignments.
G. Project Ideas	• Optional. Suggest a real client, a mobile-first app idea and at least one AI-driven feature. The teaching team verifies clients before approval.
H. Team Preferences	• Optionally name classmates you would like to work with; you need not make any statement. • Your location, transport and meeting availability help group students who can meet the client in person.
I. Weekly Commitments	• Mark class, work and activity times. If times do not match the slots, mark the rough period and add exact times in the notes row. • State the slot you would prefer for the weekly team meeting.
J. Role Preferences	• Rank each of the five TSPi roles from 1 (least desired) to 5 (most desired). Several roles may share the same rank. • Each TSPi role maps to a project role (e.g. Quality/Process Manager = QA & Test Lead). Every member still codes and owns FR-IDs; no member is given documentation-only work. • In a 6-member team, one role is shared by two members, agreed with the demonstrator.
K. Declaration	• Sign and date the form.
